

The Baker Family Tree – Book of Reference

Outline

This document gives the basic information on individuals within the four Grandparent trees – Paternal Grandfather, Paternal Grandmother, Maternal Grandfather and Maternal Grandmother. For each tree, the schematics from the web site are given, followed by tabular entries for the individuals in generation order. Each individual is numbered eg PGM3.4, where “PGM” indicates the Paternal Grandmother, “3” indicates the generation number (with the titular grandparent being generation 1) and “4” indicates the position within the generation. The latter is measured from 1 at the top of the tree to the total possible number of entries in that generation at the bottom of the tree. Thus not every number will be taken by any means, particular in the more distant generations.

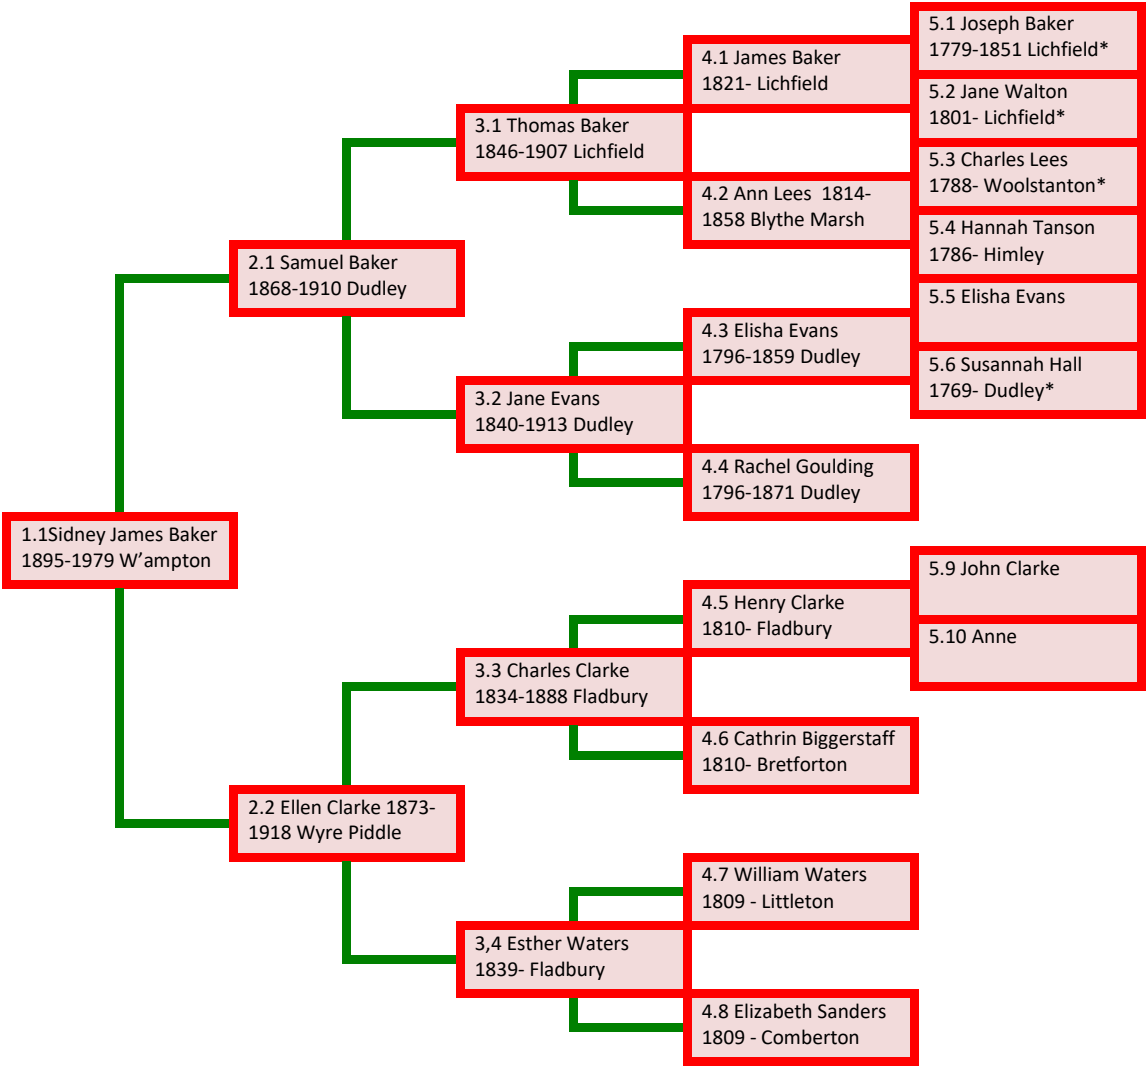

The source for the data comes from census records or from various indexes as follows.

- ESBC – England Select Birth and Christenings
- ESM – England Select Marriages
- COE – Church of England Parish Registers
- EWCRB – England and Wales Civil Registration Birth
- EWCRM – England and Wales Civil Registration Marriage
- EWCRD – England and Wales Civil Registration Death
- FAG – Find a grave

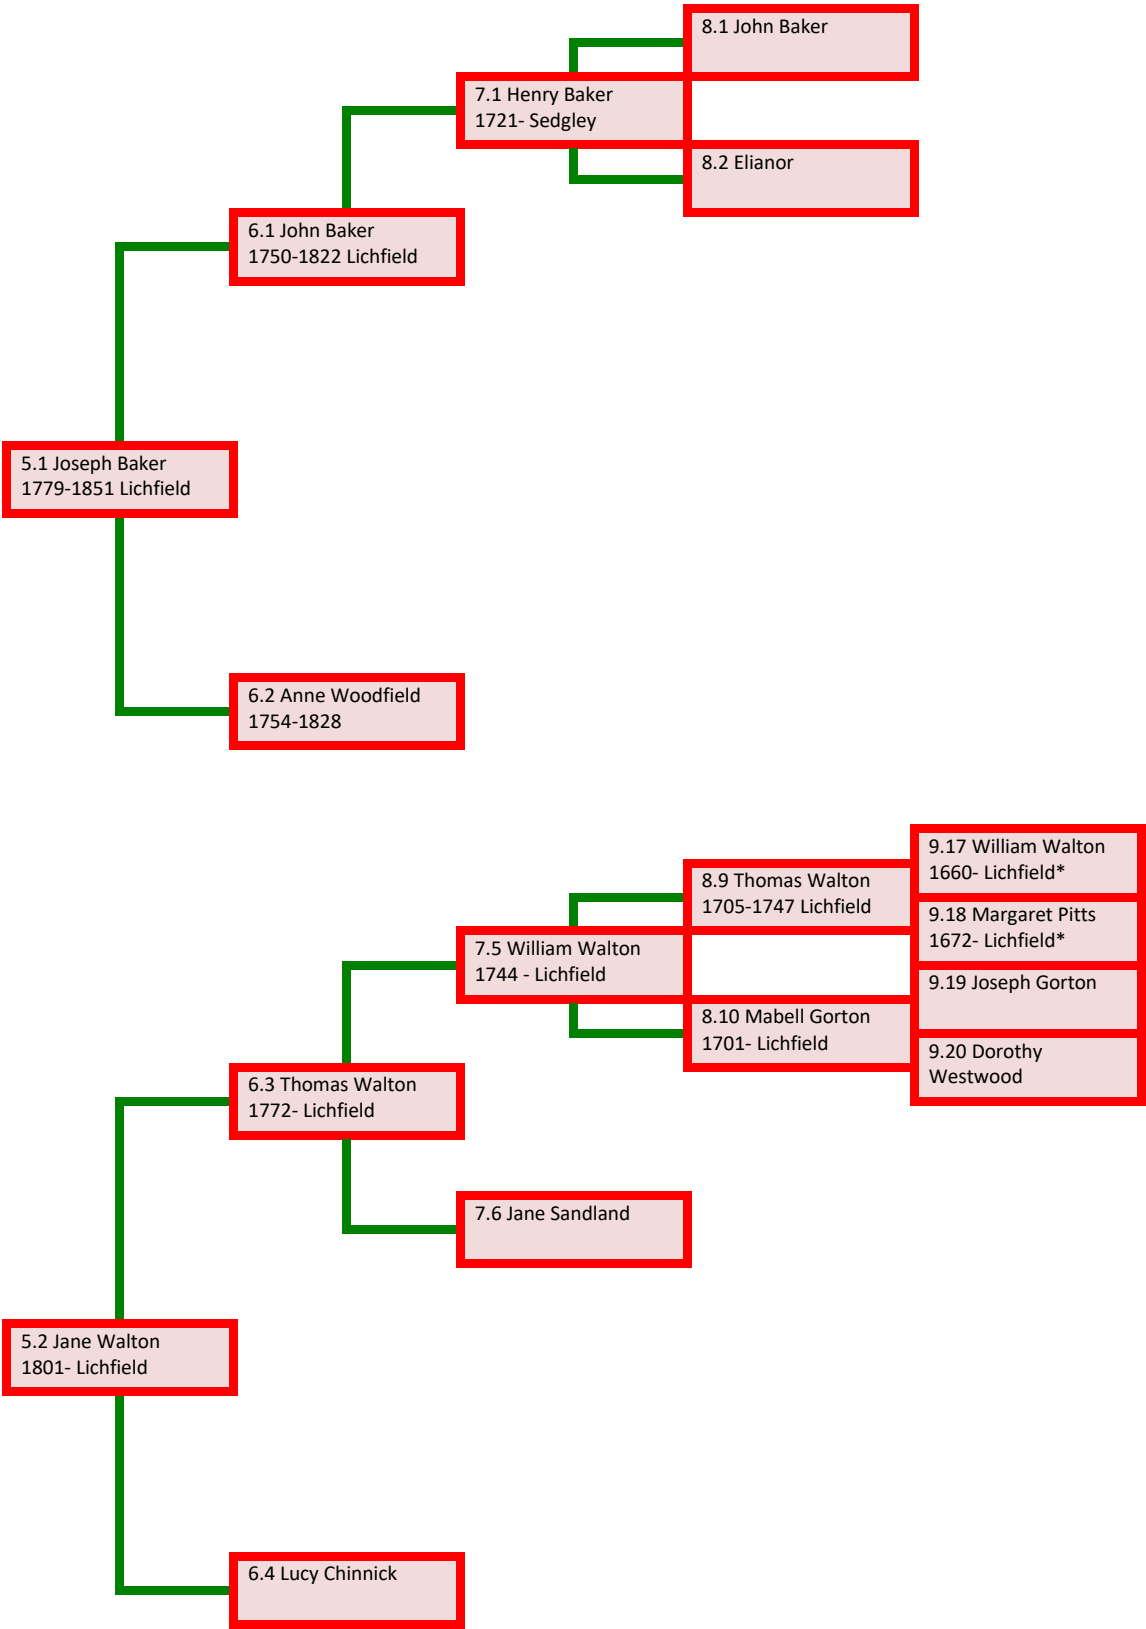

Where no entry is given for the source, these details are inferred from other sources – primarily from a comparison of various census returns.
